

# UPDATED PLATFORM OUTPUT RULE (DEVELOPER READY)

## CORE PRINCIPLE

The system must:

- always detect platform type
  - always adapt tone + structure
  - NEVER skip platform logic if relevant
- 

## SUPPORTED PLATFORMS (DEFAULT SYSTEM SET)

The system must support and adapt to:

### 1. TikTok Ads

- short
  - punchy
  - emotional
  - hook-driven
  - viral style
- 

### 2. Instagram (Posts / Reels Ads)

- aesthetic
  - emotional storytelling
  - lifestyle focused
  - soft persuasion
- 

### 3. Facebook Ads

- explanatory
  - problem → solution format
  - slightly longer copy
  - trust + clarity focus
- 

## 4. Shopify Product Pages

- structured
  - benefit-driven
  - trust + clarity + conversion
  - SEO-friendly tone
- 

## 5. Amazon Listings

- logic-based
  - feature-heavy
  - reliability focused
  - bullet-point structured
- 

## 6. General Web / Landing Pages

- balanced tone
  - persuasive but structured
  - conversion-focused storytelling
- 

## 7. Email Marketing (optional but powerful)

- personalized tone
  - persuasive storytelling
  - urgency + CTA focused
- 

# PLATFORM ADAPTATION RULE (VERY IMPORTANT)

## SYSTEM MUST ALWAYS DO THIS:

1. Detect selected platform
  2. Apply correct tone style
  3. Adjust structure automatically
  4. NEVER use one universal script
- 

## MULTI-PLATFORM OUTPUT RULE (CRITICAL DIFFERENTIATOR)

If user selects:

👉 “Multi-platform output” (Pro plan feature)

System must generate:

- TikTok version
- Instagram version
- Facebook version
- Shopify version
- Amazon version

BUT EACH MUST BE:

- ✓ unique wording
  - ✓ different structure
  - ✓ different psychological angle
  - ✓ not copy-pasted variations
- 

## STRICT RULE (IMPORTANT FIX)

DO NOT:

- only output 3 platforms
  - ignore other relevant platforms
  - reuse same script across platforms
  - treat platforms as optional
-

## SMART BEHAVIOR RULE

If user selects ONE platform:

→ generate ONLY that optimized version

If system is in Pro multi-platform mode:

→ generate ALL relevant platform outputs automatically

---

## CORE PRODUCT POSITIONING UPDATE

The system is NOT:

✗ “TikTok ad generator”

✗ “Shopify copy tool”

It is:

👉 “Multi-platform Sales Conversion Engine”
